

## 1 Scary Lion

Once upon a time, there was a scary lion called Li 2e Li 2a. His name was funny but he was not funny.

One day, Li 2e Li 2a lion went to the Western African Zoo! A gorilla was in a big cage. A big snake was also in a cage too. The snake called the lion "Hah! Don't come here!" The snake said. The tiger King looked at the lion and it looked like he wanted to hit the lion.

But the tiger didn't know Li 2e Li 2a was a strong lion. It fought with the tiger. Of course, he won over the bad tiger. All the creatures and animals called him the lion King.

## A Dream

E-Smart Learning Centre

One day, Emma Tina couldn't sleep. She saw a person flying in the sky and she was afraid. She woke up her mum and dad. She said "There is a flying person."

Then she woke up. "Is it a dream!?" She asked herself.

# Sharks

Jayden Luk

E-Smart Learning Centre

Sharks live in the sea. They can be small or big but there are more big ones in the sea. They will hunt and kill sea animals of any size. They have a scary face and very sharp teeth. They have no hands or legs but have gills so they don't need to breathe out of the water. They swim very fast. When they smell blood, they will go there and eat the prey or kill the prey. Sharks eat anything who is smaller than them. Sharks are scared of whales. They also can eat a person. If you go swimming or snorkeling, don't get hurt or if you get hurt. Swim away immediately. Sometimes, a shark will use its tail fin to hit the prey and then use its sharp teeth to eat the prey. So, we need to "Watch out" dangerous sea animals.

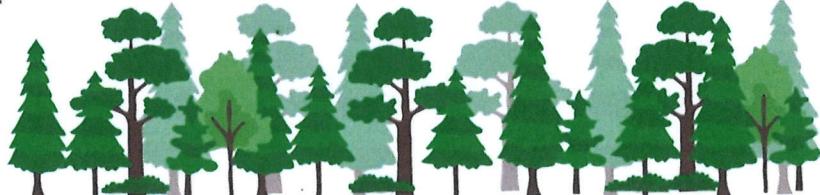

### A giraffe's life

Today I'm going to talk about how the body parts I have that help me to live in my home, the food I eat and what I like to do every day too.

I'm living in the forests of Africa. I'm a female giraffe and I always love to run around the forests because I enjoy the wild when I run every evening. In the morning I love enjoying the sun light, but ~~in~~ the afternoon I cannot enjoy because ~~the sun~~ gets too hot. At night I can hardly go to sleep because I'm scared of some scary animals that want to eat me.

I usually eat the leaves from the tree but I sometime eat grains from the tree. My very strong legs can help me kick any animals that try to hurt me. I also have a very long neck that can help me get the food that is high up on the tree. My skin is light brown with dark brown spots that can help me hide from some animals that want to eat me by making them think I am a tree.

So this is how the body parts I have help me live in my home, the food I eat and what I like to do every day.

### Training a dog

If I could train an animal, I will choose a dog, because dogs can bring things to me. I will teach him to play soccer. I think one year will be enough to teach him and if that's not enough, maybe I could extend another six months. I think it's enjoyable it, because dogs run faster than me so he can push the ball into the goal but don't kick the dog or else the dog is going to fall down to get injured so badly but you can kick harder with your friends. I think the he will enjoy it and became friends with me after I teach him soccer.
