

I am a giraffe.

Nice to meet you. I'm a giraffe in the forests of Africa. I'm shy but I'm also gentle. I eat lots of plants every day. My long neck helps me reach the leaves on the tall trees.

During the day, I usually eat and walk to find water. Sometimes I play with the other giraffes with my long neck. When other animals try to hurt me, I will kick them with my thin but strong legs. At night I take short naps in the grass.

My life as a giraffe is fine. There aren't a lot of things to do, but it is peaceful and nice.

The Best Day Ever

When I was a little boy, I dreamed of flying into the sky, and going out to space. I thought about it for a long time, but our family was poor, and had no money for such a thing.

One day, Dad, Mom and I went to my grandfather's house for a visit. We hadn't seen him for a long time and we were going to celebrate my birthday there. We stayed there for a few days.

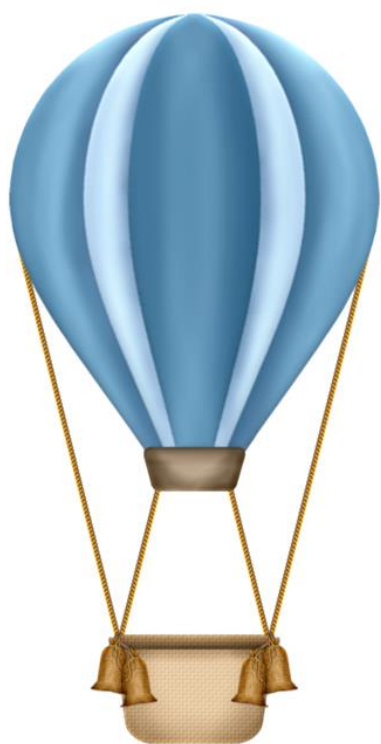

On my birthday, my father and my grandfather drove me to a place I didn't know. They said they had a present for me in the mysterious place. When we got there, I saw a big balloon.

Then, they all shouted "Happy birthday!" and explained what that was. The balloon has been made by me grandfather, Dad and mom. They knew I always wanted to go to see the sky, but they were poor, so they prepared this balloon. It has taken them a lot of time. We got on the balloon, and I saw a wonderful view and white clouds, it was fantastic.

That was the best day ever, I had received the best gift too.

A Robbery

E-Smart Learning Centre

One afternoon, I was on my way to home after school. When I was walking across a jewellery shop, I saw a robber get out of a black private car. The man was about 30 years old; he has long curly hair, wearing sunglasses, and around 1.7m tall. He was holding a gun in his hand, too!

"Oh, no!" Some people in the shop shouted. Someone was running, and the robber shot the gun twice. Everyone screamed, I was afraid. The robber said, "Shut up!" "Give me money!" But the workers of the shop didn't move. Therefore, the robber just broke the door and took plenty of gold, diamonds, money, necklaces and many other expensive items in the shop.

At last, the robber was gone in his car with a lot of jewellery. But some people were injured. Therefore, I used my phone to call the ambulance. The ambulance was quickly arrived. Doctors and nurses took the people who were hurt to hospital. I just went home carefully, and I felt upset.

The Indestructible Phone

The Nokia phone is indestructible and easy to use but let's change it. I have invented a better phone called the TNPPM also known as The Nokia phone Pro Max 2.0.

This phone is indestructible but as many people say 'The Nokia is already indestructible, why would you make it better?' This will answer your question.

Instead of just being water proof, it is heat-resistant and not just that, instead of just calling and e-mailing, now there more functions like GPS, Weather Forecast, etc.

It also comes in with many colours instead of the boring black colour. You can also customise the cast with your favourite cartoons. It also glows in the dark, so you don't have trouble finding it in the dark. There are pros and cons. For its advantage it has a hole to put an apple tag so, if you lose it you can track it. The disadvantage is it is expensive and heavy. It is also a little big so it isn't suitable for carrying it to far places.

The phone is sold on the official Nokia website. You can customise colour, screen colour and more. Hurry and buy your very own phone before it sells out in the market.

My Plan of Helping Underprivileged Children Around the World

To: [Friend's names]

subject: Concerning a plan that I have come up with...

Although this e-mail may be sudden, I hope to leap into it as soon as possible to start reaching for other people. Recently, I went on a trip to Nepal and came across the sad reality of how the education resources are, and how common it is for all parts of the world. I can't stand to acknowledge this but not give a helping hand, therefore, I am reaching out to you all, hoping you can support me in my dreams and plans of helping underprivileged children around the world.

First of all, these children are young and innocent with completely no resources or anyone to help them. They are preparing for the future when being completely gullible of the actual world outside. The conflicts and drama that await them, so how can't you not help them out? Even if the contributions aren't a lot, these children may only wait silently for someone to help them out and there are children that are now adults, still with barely any knowledge but needing to start working. These scenes are painful to see, especially considering how much they have been let down when someone finds out about the situation but is ignorant to help in any way.

Even if you don't like children and don't agree with my previous point, you can't deny this one. We need to think about the future. If children don't get the education they need they get forced to start working, the society may be deemed with countless workers or there may not be enough workers. We need to help provide education and resources to them so that there can be hope to the future generations.

Therefore, I hope that you may consider lending a helping hand and work with me to turn this plan into reality for the sake of humanity as under privileged children should be getting what they truly deserve.

Yours sincerely,

John Wong
