

My Dream Job - Milkman

As I have said before, I am really interested in being a milkman. Therefore, now I am going to do an extension of my previous writing.

The reasons that I would like to be a milkman are as follows. First, being a milkman is a relaxing occupation. Every morning, the rising sun tells me that it is time to begin my job. I start to ride my bicycle followed by some humming sounds. Birds fly happily and sing merrily. When I reach different houses, I stop my bike and carry a box of milk. "Ding dong!" heard after pressing the bell, "A bottle of milk is delivered to you!" Your thankful smile and a pleasing greeting always warm my heart. This also motivates me to keep working hard. Therefore, being a milkman doesn't have much pressure or even stress. There are even encouragements which can drive me to happiness.

Second, although milkman is an occupation in the lower-class, it doesn't make you worried. After delivering milk for the whole morning, you may do whatever you want! You can chat with your friends, go shopping, and of course, drink milk with family and friends. How relaxing!

Third, being a milkman also makes me feel like living in a fairytale world. As I am a cartoon fan, I liked watching different cartoons when I was young. Tom and Jerry, Mickey Mouse and Winnie the Pooh were some fond movies when I was still studying in my primary school. However, until now, I cannot forget the excitement and the joy that the cartoons brought me. Furthermore, being a milkman also accomplishes my fairytale dream.

The future is a mysterious world. Who knows if there will be any milkmen in the future?

Cup Noodles

As the city modernizes with new technologies, our health is deteriorating. One of the examples is cup noodles.

Cup noodles is always a good choice for business people. They are busy and they don't have time to sit down and have lunch properly. As cup noodles only requires 3 minutes to cook, it is popular among people. However, there are lots of chemicals such as gourmet powder and preservatives. Eating too much cup noodles may lead to cancer, high blood pressure, diabetes, etc. Cup noodles don't contain many nutrients. If a person only has cup noodles every day, he/she can't get the right amount and proportion of nutrients. Lacking different nutrients can lead to different kinds of diseases. So, our health is deteriorating as the city modernizes with new technology.

Our Poems

Morning Morning

Mornings are the start of my days

Ordering my day with many ways

Rain or shine

Never stops me to be on time

If it is a day for school

Nothing can stop me to be cool

Going to catch a bus

So I won't make a fuss

Why?

Why is the grass so green?

Why should we throw rubbish in a bin?

Why is the sky so blue?

Why do the presidents always rule?

Learning English

I have been learning a second language since I was three years old, it is English. At that time, speaking English was difficult for me. I found it difficult to learn English at the same time, but I really enjoy it now because I like reading English books and I like writing English so much. I need to learn English because my mother wants me to get high marks in exams. I have to do many exercises of English and talk to more people in English. Last year my mum thought that my English grammar was bad so I came to E-smart to learn English grammar. She thinks I am better now but my writing is still bad so she wants me to go to writing class. Now, my English is much better than before but it is still not good enough. I hope I can do better in the future.
